PROFILE

A dedicated and results-oriented Software Engineer with a strong foundation in computer science and hands-on experience in programming, web development, and software design. Skilled in Java, Python, Dart, and front-end technologies like HTML, CSS, and JavaScript, with a proven ability to build, manage, and deliver high-quality projects.

PROJECTS

- **Student Attendance Management System**
HTML, CSS, SQL, PHP, XAMPP
 - Developed a website for managing Student's Attendance.
 - The website is designed to manage Student Attendance by allowing teachers to mark attendance of a student.
 - It allows teachers to monitor attendance of a specific student or class to find out whether students coming to school/college on regular bases or not.
- **Fire Detection Through CCTV**
GOOGLE COLAB, PYTORCH, YOLOV5
 - Developed a software which is integrated to CCTV to find whether there is a Fire or not.
 - If the Fire is detected it will check confidence level if it is $\geq 60\%$ then Alarm will Ran and alert the User.
 - It will also send an email with footage of how the fire caused to alert the user if he/she away from the system
- **The Dinosaur Game**
C, GLUT
 - Developed a computer graphics game.
 - It is a 2D side-scrolling endless runner game.
 - The game's objective is to control a dinosaur through a landscape, avoiding obstacles to achieve the highest score possible.

COURSES & INTERNSHIPS

- **Cyber Security and Ethical Hacking**
System Hacking
Coincident
May 2023 - Jun 2023
- **Crash Course on Python**
Introduction to Python Programming
Coursera
Jan 2023 - Apr 2023
